skycore CLOUD SERVICES

skycore CLOUD SERVICES is a growing collection of fully-managed, enterprise-grade services - computing, networking, storage and more - to enable enterprises to better serve their business and customers via dependable business solutions that deliver significant cost savings and increase overall customer satisfaction.

- Save up to 50-70% off your AWS bill
- NO CapEx investment - 100% OpEx, pay-per-use
- NO long-term contracts required
- NO traffic fees
- Support included
- Full-featured enterprise cloud
- AWS compatible
- Swiss company

WHY PARTNER WITH US

skycore offers a powerful compute, networking and storage platform to meet the cloud objectives of customers. Many organizations are in the process of vetting and selecting their future cloud provider. skycore CLOUD SERVICES - coupled with your value-added services - delivers the ideal business solutions for the best price-performance investment. Save your company up to 50-70% off the AWS bill. Organizations who integrate skycore CLOUD SERVICES benefit from the flexibility, reliability and scalability of an enterprise-ready cloud. Backed by a growing partner network of 300+ clouds, global network of MSPs and supported by our battle-tested, fully-managed cloud solutions - each featuring 24/7/365 support from our experts and 100% SLA guarantees - your customers can rest assured that they are partnering with a cloud services provider that will deliver. skycore also supports organizations needing hybrid and/or multi-cloud deployment requirements, enabling them to move workloads between their own data centers, partner data centers, private collocations, and skycore without risking single vendor lock in or long-term commitments. NO CapEx investment and NO long-term contracts required.

skycore CLOUD SERVICE OVERVIEW

zCOMPUTE

- Pay-as-you-go, consumption pricing options
- Commitment to match/beat AWS pricing
- Hybrid and multi-cloud options to leverage existing environments
- Broad support for Open Source Software (OSS)
- Auto-scaling to adjust resources to meet evolving requirements

zSTORAGE

- Block Volumes designed to reduce latency and increase throughput;
- AWS EBS compatible
- File Share (NAS) to provide scalable file shares via NFS or SMB protocols
- Zadara Object Storage (ZOS) delivers infinitely scalable, private or public instances via AWS S3 or Swift APIs

zNETWORKING

- Zero hidden transport fees; free ingress and free egress
- Load balancers, traffic managers and powerful content delivery network (CDN) options
- High throughput, low latency, resilient
- Elastic IP (EIP) to expose instances outside of zCompute environments
- Security groups feature to provide ultimate control over inbound/ outbound traffic

YOUR EXPERT IN MANAGED CLOUD SERVICES

We deliver enterprise-grade cloud services - compute, networking and storage - in an agile model, with 24/7 expert management — leaving you free to focus on your customers.

ENTERPRISE-GRADE PERFORMANCE AND SECURITY

Dedicated vCPUs & memory, SSDs and HDDs, in-flight and at-rest encryption, snapshots, mirroring, HA

AGILE, INFINITE RESOURCES. PAY ONLY FOR USAGE.

On premises, co-location and in the cloud, scale up or down, pay as you go, hardware upgrades included

EXPERT MANAGEMENT 24/7/365

24/7/365 proactive support, seamless migrations, upgrades, from senior technical resources

THE skycore ADVANTAGE

SIMPLE PRICING

Take the guesswork out of the cost to operate with skycore Cloud Services. You will appreciate the simplicity of Skycore's pay-as-you-go consumption-based model.

NO HIDDEN FEES

Stop paying exorbitant ingress and egress fees! The big cloud providers today levy extra charges for data transit between elements of storage and compute, data in/out of a cloud domain and utilization of load balancers, DNS, etc. skycore CLOUD SERVICES makes for pricing and budgeting simplicity, and can save your company up to 50-70% off their AWS bill.

100% OPEX

With NO CapEx investment and NO long-term contracts required, you can now offer high-performance elastic cloud services, including edge computing, without financial or operational burdens. Scale up, down or turn skycore services off at any time and only pay for what you use.

THE skycore ADVANTAGE

EXTEND EXISTING ENVIRONMENTS

skycore CLOUD SERVICES can help you to extend any infrastructure including on-premises, hybrid, multi-cloud environments. With skycore you can bring x86 compatible processing to your on-premises datacenter or colocation to build and deploy consistent hybrid applications. Use skycore to consolidate on-premises applications on cloud-connected hyperconverged infrastructure to get the best in price performance.

ENHANCE DATA SECURITY

skycore provides a fully multi-tenant platform that allows comprehensive user-defined permission sets and security policies. skycore also integrates seamlessly with multi-tenant authorization controls (LDAP, Active Directory) and integrates a DNS service for private networks. Define private zones, which can only be resolved within associated Virtual Private Clouds (VPCs), to meet application security or compliance requirements.

"were able to quickly deploy a world-class product offering to address real customer demand, without large startup capital expenses.."

Damian McCann Viatel

THE skycore ADVANTAGE

DELIVER MAXIMUM FLEXIBILITY

skycore automatically scales compute resources to ensure high availability, performance, and efficient resource utilization for your customers. With the native monitoring service, auto-scaling allocates resources based upon measured utilization of CPU, memory, and networking resources. skycore's scale-out architecture for cloud-native applications is equipped with load balancers services and enables customers to provision managed load balancers for fault tolerance and application scalability on-demand.

OPTIMAL BALANCE FOR PRICE-PERFORMANCE RATIO

Enable your customers to move their data and applications to your feature- rich and consumption-based adjacent cloud. With skycore you can ensure that workloads requiring low latency are placed in close proximity, while distributed, scale-out workloads are placed on different, related resources. skycore's native active resource rebalancing allows the cluster to redistribute load across nodes to ensure optimal performance across VMs.

THE skycore ADVANTAGE

AWS COMPATIBLE

Leverage your customer's familiarity with AWS. skycore enables multi-cloud capabilities with easy testing and migration options. Migration is easy with zCompute's batch-oriented tools for migrating deployments from major platforms like AWS, VMware, and Microsoft Hyper-V/Azure. skycore also provides a comprehensive library of API's for provisioning and managing resources with compatible syntax and features, as well as code libraries such as Terraform.

GLOBAL REACH

zCompute can be deployed both in core data centers and geographically distributed edge locations. This enables companies to provide cloud capabilities across all existing locations, removing the dependence on public cloud availability zones.

99.999% OUR STORAGE SLA

Our SLA is posted publicly and contractually commits to 99.999% of availability, for more than most cloud service providers.

99.9995% THE REALITY

Our track record over multiple years exceeds not only our contractual commitment but also the availability of top storage brands.

THE skycore ADVANTAGE

AWARD-WINNING ZSTORAGE SERVICES

Enterprise storage features include provisioning, snapshots, mirrors, dedupe and compression, online volume migration and Object Storage with Object- Lock immutability. Our storage systems can be installed on-premises or at edge locations, and managed centrally, to create unified, 100%-OpEx solutions for avoiding ransomware downtime, simplifying NAS backup, protecting Microsoft O365 data and delivering data immutability & air gap protection for any primary or secondary storage environment.

- Any data type or protocol - Block (iSCSI), File (NFS and SMB), Object (s3 and Swift)
- Available anywhere - On-premises, in private collocations or at edge locations
- Predictable, high-margins
- Only unified, multi-tier storage solution for Veeam 3-2-1-1-0
- Backup and recovery
- Multi-tenant efficiency, with total resource isolation per tenant.
- Fully managed 24/7/365 services with 100% SLA guarantee

100%

CREDIT BASIS

Because we are committed to your success we find all downtime unacceptable. We therefore credit you for all storage outages, no matter how short.
