# Your Challenges

**DETECT WEAKNESSES BEFORE OTHERS DO!**

- Ever-evolving cyber threats
- Increased regulatory requirements
- Unattended security vulnerabilities of third-party plugins lead to data breaches
- Irregular security tests within organizations
- Expensive and labor-intensive manual pen-tests

skycore

core.security

# Our solution

- Continuous search for a wide variety of risk indicators including cybersecurity, regulatory compliance, financial risk and reputation
- Innovative scanning technology from leading penetration testing experts
- Automates the detection of security gaps in your websites, applications, your network and cloud infrastructure
- Tests complex online applications
- Provides unparalleled accuracy and detection rates
- Automated, external penetration/vulnerability scan
- Daily risk assessment
- Automated assignment of risks to your ISO & GDPR requirements
- Advanced analytics based on AI and machine learning
- Deep and dark web searches, including leaked data and emails

*There are many IT specialists, but we convince through our partnership and customer-oriented methods.*
